

**REFERENCE PROJECT OF THE WALDORF SCHOOL MODEL
PRAGUE 5 - JINONICE (CZECH REPUBLIC)**

Organization of work meetings using sharing techniques and joint structure modelling. The model was created thanks to the initiative of the parents and teachers of the school, at their joint meeting. The concept of the school project is still under development and the activities are still continuing within smaller task groups. The artistic method of sharing and joint structure modelling is one of our main work techniques. The client is thus consciously connected to the spiritual level of the assignment.

**ORGANIC ARCHITECTURE
BASED ON THE PRINCIPLES OF ANTHROPOSOPHY**

Organic architecture and natural building materials

Construction of an environmentally friendly family house

Nursing care home for mentally disabled

Emphasis on the artistic process of design, involvement of the client in the design process.

Design of treatment and educational facilities, Waldorf schools. Eurythmic halls.

Plans for nursing care homes and hospices. Community planning and urbanism.

Educational centre designs. Cultural buildings, libraries, theatres, spa and treatment facility buildings.

Environmental projects based on natural building materials. Combination of arts and crafts in the building process.
